

The Short Circuit

September 2011

since 1927

Volume 84, Issue 9

HAMCON INC. CONVENTION

The convention is held at the Torrance Marriott, Sept 9, 10 & 11, 2011. There will be social activities on Friday evening so come and pick up your registration packet and visit the exhibitors and your friends. We are looking forward to seeing you there for the GREAT weekend of technical talks, looking at all the new radios with the vendors and buying extra tickets for the Major and Periodic drawings. Don't forget to bring the wife along too, as we are right next to the Del Amo Mall.

HAMCON Prize Workers Needed

URAC has the responsibility to administer the prizes and drawings for the HAMCON 2011 / ARRL SW Division Convention being held in Torrance at the Marriott Hotel September 9, 10 and 11, 2011. Doug Dowds, W6HB, is the Prize Chairman and he will require support selling tickets for the Major and Periodic drawings as well as during the conduct of drawings themselves. There will be drawings at 0900, 1100, 1400 and 1600 on Saturday and at 1000 on Sunday. Periodic prizes not claimed by 1100 on Sunday will be redrawn starting at 1130. The Early Bird, Pre-Registration and Registration prizes will be drawn at the Saturday night banquet.

URAC members willing to support the prize efforts and available to work the required shifts during the convention are requested to volunteer by E-mailing Doug at w6hb@arrl.net.

The Club's No-host Breakfast is held 8:00 am on the First Saturday of each month at the **Think Cafe** at 302 W. 5th Street, San Pedro, CA

Saturday, September 3, 2011

The United Amateur Radio Club held its' monthly breakfast meeting at Think Café on Saturday 2011-09-03. We had 16 persons in attendance. The discussion was fairly lively and drifted rather widely. Here are the highlights.

Dale (W7IXL) – Noted that we have a number of outstanding things to do to the K6AA antenna farm. First, we need to remove the rotor from the vertical (Dale figures a vertical doesn't need a rotor). Second, another of the rotors does not indicate properly. Maybe a cable problem, maybe need a new rotor. As mentioned during the net, somebody found the Strudel place on 7th in San Pedro. Homer went by and checked it out. Dale brought the menu in to prove they have more types of Strudel than you can shake a stick at. The Los Angeles Maritime Institute is moving and having a giveaway of office furniture. We may go there to see about getting some chairs for the station (October 1). The packet radio wasn't working because the plug fell out, and Dale fixed it – he put the plug back in.

Martin (K6UB) – showed an article in BMW car club magazine mentioning Mary and himself's participation in a recent rally. He is the author of the article (as well as the photographer)

Mary (K6UB XYL) – nothing to report.

Treva (K6HMS) – Gary is currently off to London. She offered up a jacket from the Bakersville to Vegas race for anyone who might want it. Her kids have just bought a place in southern California, so soon the trips to northern California will cut way back. Finally, she noted that Gary has been trying to help a new member (Dan?) who is having trouble joining the weekly net because he cannot get to the repeater. Kids house have clay tiles on the roof, which you can't walk on – they break easily – very. Picked up a flat screen TV but it has a bright light that is always on, so they took it back (generated some discussion about flat screen TV's and DVD formats etc).

John (WA6SDK) – nothing to report.

Scotty (K6ZNL) – mentioned that Jim had a cross-band repeater in Long Beach, but he hasn't been turning it on recently. She also has problems hitting the net repeater, even though she has a good dual band antenna. Going to work the Conquer The Bridge race on Sunday. Taking a cruise later in the month. We need some more chairs for the club station. If we can't get some donated, or turn them up from somewhere, we are going to have to purchase some.

Bill (W6AJ) – is working on his WAS on 600 meters – on the Lane Victory. They recently went out, with 900 people on board. He noted that because one of the boilers is out the Coast Guard requires them have a tug boat accompany them. He also noted the Coast Guard has been giving them a lot of "help" lately. Dale is looking for volunteers to help fix antennas on the roof of the museum, but nobody with gray hair is allowed on the roof.

Jack (K6JWR) – Helped set-up and take-down for ILLW, but did no operating. Went to the Camarillo airshow (took a lot a pictures). Otherwise, looking forward to Hamcon.

Bruce (AG6BJ) – Handed in his 100 QSL cards in support of his DXCC application. He recently installed (or was working on installing) a tower that he bought from Ivan. The first installation really wasn't in a clear spot, so after consulting with So. Cal Edison, he moved it. He noted that his son is in town and being a mountain climber is the perfect person to do any necessary tower climbing. Unfortunately for Dale and the needs of K6AA, Bruce has him booked solid for his week here. Don and he are going to go play with K3's after the meeting. His Yaesu is on the fritz again. Finally, he noted that he had been to see Jim.

Doug (W6HB) – Questions about the bar-b-q plans are being deferred to the board. Escaped for the weekend. He worked International Lighthouse and Lightship Weekend. Got about 70 Q's, but most were lighthouses. He noted he has a spare rotor. Mentioned Hamcon. Several companies have donated some large prizes. Flex has donated a radio. So has Kenwood TS-590F. He has an Comet antenna analyzer as one prize. Passed around a sign-up sheet for those who have volunteered to help sell prize tickets. Go to www.hamcominc.org for more details. Doug had some follow-up news about Jim. He also mentioned that there are three shifts at the museum where we could use some more operators

Minutes from Breakfast (continued)

for K6AA (Sunday morning, Tuesday afternoon, Saturday afternoon). Finally, he mentioned TWiT and HamNation, the weekly ham radio web based television show.

Ana (W6HB XYL) – Noted she now has 4 kids in college. One is at Cal State Fullerton working on computer game design. Has only three students, hoping for more. School start soon. .

Don (NA6Z) – Noted he is resigning from checking into the weekly net until he gets his radio fixed (more likely until he resolves issues with not being able to hit the repeater). He lives in Hawthorn – near Aviation and El Secundo.

Otherwise, he has been seeing some pretty bad times, but last month he took an Alaskan cruise that was nice and cheered him up. He described one of the excursions on a “banana boat” that was “interesting” (basically, it was free because nobody would be silly enough to actually pay for the experience). The cruise was for their 25th anniversary.

After the breakfast he and Bruce were going to go play with the K3.

Homer (K6HKT) – nothing to report.

John (KC6JHV) – Mentioned that he and several other members rode the Angelena II on a harbor tour a couple of weeks ago. His parents just got back from their 60th anniversary Alaskan cruise. Going to Las Vegas later this month.

David (W6KL) – nothing to report.

The door prize was one by --- somebody who wasn't officially there.

Jack

K6JWR

CHAIRS !

The K6AA station is in need of 2 or 3 office type chairs...

our current crop date from the early 80's. Anyone who has a line on free or low cost office chairs please communicate with Doug, W6HB@aol.com or Dale, W7IXL@arrl.net. Thank you from the sitting operators.

It's Time to Volunteer!

Greetings from the Museum!

Summer may be winding down, but we're going full speed ahead. Our curator, Emma Lang, assisted by our registrar Lucy Ruggirello, has been working diligently on the new exhibit highlighting the 70th anniversary of our building and the history of the ferry service. The museum's exterior makeover is almost complete, and we are anticipating the new harbor construction to begin later this year.

With all of these improvements, we can expect more visitors as the San Pedro waterfront becomes a true tourist destination. Of course, that means more visitors to the club as well! We receive very enthusiastic comments from the public, but there are some days when the club is empty due to a lack of volunteers. If you're thinking of spending some time at the station, meeting new people, and sharing your amateur radio expertise, now's the time! See Doug Dowds W6HB for details.

Thanks to all of our K6AA Museum volunteers!

Marifrances Trivelli
Director, Los Angeles Maritime Museum

2011 Angelina II Cruise Fun in the Sun

I built this for somebody who then went out and bought a PC from a big box store, so I'm stuck with it. It's built with all NEW parts, and I'd just like to get my money out of it, so here it is!

Motherboard: MSI GF615M-P31

Has four rear, and two front USB 2.0 ports, real printer port, and a real serial port

Processor: AMD Athlon-II X3 3.1GHz "Triple Core"

Memory: 4GB PNY DDR3-1332MHz

Hard-Disk: 320GB Western Digital "Caviar Blue" SATA

Optical Disk: Asus CD/DVD Burner SATA with NERO 9 software

Video: Onboard Nvidia GeForce 6150SE 256MB video memory

Sound: Onboard RealTek ALC888S "High Definition" audio

Network: Onboard RealTek RTL8150E Built-in 10/100MB Ethernet

Case: SuperCase DM-317 low-profile desktop case with 275 Watt power supply

Currently running Windows XP Home edition. Fully compatible with Windows 7 64-bit

Comes with a new keyboard and mouse, NO monitor.

\$250, and if you want, I'll install Windows 7 Home Premium 64-bit for an additional \$100, my cost for the software.

If interested, contact KQ6EA, Jim Jerzycke at 562/422-0024 or email kq6ea@verizon.net

AMSAT 2011 Field Day Results for K6AA

URAC did quite well again this year in the 2011 AMSAT Field Day standings.

K6AA came in 4th out of 14 entries, with a total of 45 contacts.

We made 45 contacts this year, ten more than the 35 we did last year, and we did it with *four* fewer satellites in operation this year than last year.

On the whole, there were fewer stations competing this year, fewer satellites available, and fewer contacts made between the participating stations. The individual station scores were higher this year, indicating that if we would have had the “missing” 4 satellites, the total QSO count would have been significantly higher.

A year-by-year breakdown is as follows:

Year	2008	2009	2010	2011
Satellites	8	12	13	9
QSO's	220	328	387	335
Stations	17	20	18	14

AO-7 was the most popular phone satellite, followed by VO-52 phone, and FO-29 phone.

There were times AO-7 sounded like 20 Meters on a contest weekend, and VO-52 was just as crowded! It's too bad that HO-68 was not operational this year, as K6AA made almost *half* of our total contacts using HO-68.

Submitted by Jim Jerzycke KQ6EA

It's Back to School Time...for Ham Radio, too! **... Dan Romnanchik KB6NU**

As I write this, it's about 85 degrees, and I'm sitting on the patio of a cottage overlooking Elk Lake in northern Michigan. This idyllic spot is about as far away from school as you can get. And yet, in less than a month, kids will be back in school, and if kids are going to be back in school, why not ham radio operators?

The fall is a good time to begin teaching a new group of Technicians. I favor the "Tech in a Day" or "Ham Cram" type of class. This type of class focuses on teaching students the answers to questions on the test rather than the material itself.

There's a lot of controversy about this, and many decry this method of teaching, but I think the best way to learn about ham radio is by actually doing it, and you can't do if you don't have a license. Besides, how much more instruction will students actually get in a more traditional eight-week or ten-week course, maybe 16 hours? Will those 16 hours make that much of a difference?

For the sake of argument, let's say that you've decided to offer a one-day Tech class. Now what? Well, the first thing you have to do is to find a place to teach it. Possible sites include your local public library, a township hall, a community college, perhaps even your church.

Now that you have the place, you need to find some students. Your local emergency-management group would be a good place to start. Also, make sure a notice gets published in your amateur radio club's newsletter. Chances are most of the subscribers already have licenses, but they may have friends or relatives who would be interested. Also, make sure the class gets listed in the upcoming events section of local newspapers or magazines.

Once people start signing up, you should suggest that they either purchase a study guide or download my free study guide (www.kb6nu.com/tech-manual). Because I use my study guide when teaching the class, I always advise them to get a copy, but if you'll be using other materials, then your advice may differ.

I counsel the students to read through my study guide a few times and take some online practice tests before coming to class. That will make them familiar with the material, especially areas they may be weak in or have questions about. By bringing those questions to class, we can address those areas in a little more depth, which will, hopefully, give them the help they need to pass the test.

The class itself is six hours long, running from 9am to 3pm, at which time we give them the test. This is not a lot of time for the amount of material I have to cover, so I move along at a pretty brisk pace. I concentrate on giving them the answers, but with enough context so that it all makes sense.

OK, let's say your class was wildly successful, and you now have a group of newly-minted Techs. What do you do now?

Well, you might consider offering some short sessions on what ham radio operators do--Ham Radio 101, so to speak. The topics could include how to choose your first radio, the basics of FM repeater and net operation, and building your first antenna (say a 2m ground plane). They'll be more enthusiastic about these classes now that they actually have a license.

It might also be a good idea to schedule a General Class license course for sometime shortly after the Tech class. This will encourage them to upgrade while they are enthusiastic about the hobby.

I hope that this has encouraged you to offer some ham radio courses of your own. If you have any questions, feel free to e-mail me at cwgeek@kb6nu.com or phone me at 734-930-6564. Good luck, and let me know how your classes turn out.

=====

When not preparing for his next ham radio class, Dan publishes the "No-Nonsense" study guides for the Technician and General Class license exams. Free versions and print version are available from his website at www.kb6nu.com/tech-manual. E-book versions are available for the Kindle and devices that run the Kindle app on Amazon.Com and for the Nook on BarnesandNoble.Com.

Two Amateur Radio Courses

FCC "**Technician**" course (entry level)

FCC "**General**" course (2nd level)

Each course is 2 sessions

The 2 sessions are on 24 September & 1 October 2011

Technician 10:00 AM to 2:00 PM both Saturdays

General 2:15 PM to 5:00 PM both Saturdays

FCC tests will be 10 AM to noon on 8 October 2011

The location is Hesse Park

29301 Hawthorne Blvd.

Rancho Palos Verdes

- No pre-registration required -
- No fee for either course -
- Taking the FCC Test is \$15 -

Optional Material

- Gordon West book with all the FCC test questions,
\$22 for the Technician and \$22 for the General -
- Copy of my Power Point charts,
\$18 for the Technician and \$18 for the General -

For courses sponsored by the Palos Verdes Amateur Radio Club, students thru grade 12 who pass their examination at a PVARC VE session will, upon application to the Club, be eligible for reimbursed up to a maximum of \$50 to cover the cost of materials and the examination fee.

For more information contact Walt, K1DFO, at walt.ordway@yahoo.com
